EDUCATION

Sardar Patel Institute of Technology, Mumbai

Aug 2023 – Aug 2027

B.Tech in Computer Engineering **CGPA: 8.5**

Andheri, Mumbai

- **Coursework:** Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, OOPS, Data Science

Barclays India

Jan 2025 – Dec 2026

Minor in Banking Technology **CGPA: 9.0**

Andheri, Mumbai

- **Coursework:** Data Engineering & Analytics, Data Pipelines (Kafka, Spark, Hadoop), Data Lifecycle & Governance

LEADERSHIP ROLE

Tech Head

Sept 2024 - Sept 2025

National Innovation and Startup Policy (N.I.S.P)

Andheri, Mumbai

- Developed and deployed a MERN-based event platform serving 150+ users, featuring real-time leaderboards and secure document access.

PROJECTS

AetherNet 🗄 | Next.js, Express.js, Solidity, Ethereum, IPFS, Viem

March 2026

- Architected a decentralized AI-agent marketplace using smart contracts to orchestrate task allocation across agents based on on-chain reputation, cost, and execution latency, enabling trustless and automated coordination.
- Developed a multi-agent consensus framework to synthesize high-quality strategic blueprints, enforcing access via contract-driven encryption and conditional key release mechanisms.
- Built a verifiable execution pipeline integrating IPFS-based content addressing, client-side cryptographic signing (Viem), and oracle-backed validation, ensuring immutable outputs and reliable agent performance tracking.

GlacialGuard 🗄 | React.js, PostgreSQL, Express.js, Supabase, TensorFlow, Twilio

Sept 2025

- Built a unified monitoring dashboard using React and Leaflet, integrating weather, IoT, and satellite data to provide real-time insights for disaster management teams.
- Trained a custom R-CNN model using TensorFlow to detect GLOF precursors from satellite imagery with 94% accuracy, reducing manual analysis time by 95%.
- Designed a dual-mode alert system delivering real-time notifications via SMS and WhatsApp APIs, with offline caching for uninterrupted access during network failures.

F.A.K.E (Fictional Analysis Knowledge Engine) 🗄 | Next.js, Express.js, Neo4j, TensorFlow **Apr 2025**

- Engineered an AI framework leveraging NLP and knowledge graphs to analyze fictional content and ensure narrative consistency across books, scripts, and game lore.
- Developed a semantic extraction and contradiction detection system using transformer models, achieving 90% accuracy in identifying timeline and character inconsistencies.
- Built an interactive dashboard using Next.js for querying and visualizing story relationships, improving content analysis efficiency by 40%.

TECHNICAL SKILLS

Languages: Java, C, Python, JavaScript, TypeScript, HTML, CSS

Technologies/Frameworks: Tailwind CSS, React.js, Node.js, Express.js, Next.js

Databases: MongoDB, SQL, PostgreSQL, SQLite

Libraries: NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, TensorFlow, Bootstrap

ACHIEVEMENTS

- 1 Hackathon Winner - ML Sprint Hackathon — developed a high-impact ML solution under competitive constraints, outperforming multiple teams
- HERE Hackathon Finalist — Earned a finalist spot in a highly competitive hackathon by HERE Technologies, the industry standard for enterprise mapping and location data
- Finalist in 7+ national and global hackathons and CTF competitions — including HERE, ETH Mumbai, HackCelestial (PCE), HackSync (TSEC), VJTI CTF and KJSSE CTF — consistently ranked among the Top 10
- Solved 500+ Data Structures and Algorithms problems across platforms including LeetCode, Codeforces, CSES, GeeksforGeeks, and CodeChef — demonstrating strong problem-solving and algorithmic proficiency
